RE: Kraft Subdivision Unit 3 – Design Approval

Dear Mr. Burnett:

The Guadalupe-Blanco River Authority (“GBRA”) is the wastewater service provider within the Kraft Subdivision located in Guadalupe County, Texas. GBRA has reviewed your 09/30/2024 design resubmittal for Unit 3 of the Kraft Subdivision. GBRA hereby approves the design for construction. GBRA’s design approval is reliant upon the adequacy of the work of the engineer of record. All responsibility for the adequacy of the design remains with the engineer of record. If construction has not commenced within one (1) year of this GBRA design approval, approval is no longer valid.

Prior to construction, please provide copies of conformed drawings each copy clearly marked “for construction” as follows: complete project drawing sets shall include dry utilities, roads, grading, storm sewer, sanitary sewer, water, etc. Please deliver these to my attention at the address below.

- One (1) CD/PDF electronic copy.
- Two (2) 11”x17” half scale simplex printed and bound copies.

If we may be of any further assistance, please contact me at 830-379-5822 or [dworley@gbra.org](mailto:dworley@gbra.org).

Sincerely,
